- 2 Several journeys per year
- 3 One journey per month
- 4 Several journeys per month
- **5** One journey per week
- 6 Several journeys per week
- More than one journey per day

Reading Guide

The intermodal use of light individual mobility seems to primarily serve commuting trips, with a nearly daily frequency for 53% of travelers.

This share rises to 64% for private electric scooters, compared to 47% for conventional bicycles.

Conversely, the combined use of bicycles with public transport was done for the first time during the administration of the questionnaire, by 19% of users, compared to only 5% for electric scooters.
